CONCENTRATED NITRIFYING BACTERIA

- Removes ammonia & nitrite
- Immediately add new livestock
- Prevents fish loss

Authorised Wholesaler for Fritz Industries
Proud Distributor for FritzZyme 7 & 9

FritzZyme 7 & 9
The Original Live Nitrifying Bacteria
Rapidly Eliminates Toxic Ammonia and Nitrite
Allows Safe Immediate Introduction of Livestock
Prevents "New Tank Syndrome"
Establishes and Maintains a Healthy Biofilter
Prevents Fish Loss.
FritzZyme® 7 and 9 contain specific strains of live nitrifying bacteria proven to reduce fish loss due to toxic levels of ammonia and nitrite. Nitrifying bacteria can take weeks to naturally establish colonies in new aquariums while ammonia and nitrite can reach lethal levels in only a few days. FritzZyme provides the proper balance of bacteria proven to rapidly seed biofilters, greatly reducing the natural cycle time allowing for safe, immediate addition of livestock.

FritzZyme Nitrifying Bacteria may be added to new tanks or established systems any time the biofilter needs fortification including; after water changes, aggressive cleaning, adding new livestock, medicating, or changing filter media.

Available Sizes
FritzZyme 7 (Freshwater)
- 8 oz (236 ml) Treats up to 40 gal (151 L)
- 16 oz (473 ml) 80 gal (302 L)
- 32 oz (946 ml) 160 gal (605 L)
- 1 gal (3.78 L) 640 gal (2,422 L)

FritzZyme 9 (Saltwater)
- 8 oz (236 ml) Treats up to 20 gal (75 L)
- 16 oz (473 ml) 40 gal (151 L)
- 32 oz (946 ml) 80 gal (302 L)
- 1 gal (3.78 L) 320 gal (1,211 L)
Have you been using Canadian Mysis? It is Great, but so Expensive!

Now from the very same Lake, the very same Mysis, with the very same Nutritional Benefits,

here is MYSIS SUPREME, from Aqua Treasures!

What is the Difference? PRICE!!!
NatuReef, feels that maintaining a marine ecosystem shouldn't be a struggle, but a joy and a passion. NatuReef created their products with nature in mind, believing that the natural habitat of the ocean is the model to strive towards. Let us help keep your marine aquarium happy and healthy, and allow you to spend your time enjoying the growing rewards of your investment.
New Era Aquaculture is a manufacturer of high quality fish foods, which has been rapidly gaining market share in the UK, Europe and abroad for the past five years.

What makes New Era feeds, so special & unique, is that the flakes and pellets are all processed at the lowest possible temperature.

New Era has developed processes for preserving the nutrition of the ingredients and their foods are extremely popular with large public aquariums and aquaculture operations.

The success of the large public aquariums is now available to the hobbyist, from beginner to expert.

Extraordinary Products @ an Ordinary Price !!!
PHYTOPLANKTON
The Essential Diet for all Reef Inhabitants.

- 100% NATURAL
- FRESH
- MOTILE
- SUPER NUTRITIOUS

No Preservatives or Additives
100% NATURAL, LIVING PHYTOPLANKTON

- FRESH, MOTILE, SUPER NUTRITIOUS
- NO PRESERVATIVES OR ADDITIVES
- RAISED IN FLORIDA AT OUR AQUACULTURE FACILITY

Dr. G's Phytoplankton is alive, fresh and guaranteed to be the best "LIVE PHYTOPLANKTON" product available.

Dr. G's Phytoplankton is freshly Aquacultured, living micro algae and is the perfect nutrition for Corals, Filter Feeders, Invertebrates Zooplankton and small fish. Feather cluster worms, soft corals, clams, tunicates, zooplankton and other reef inhabitants can't survive without phytoplankton.

Our Phytoplankton is not extracted or preserved and no preservatives or additives are needed. It is not a concentrated paste or spray dried.

Dr. G's Phytoplankton is extremely rich in Omega 3 fatty acids, HUFA's, Antioxidants (EPA), natural iodine, vitamins and has two natural antibiotics which increase survival rates in larval fish and zooplankton.

NATURAL, LIVING
Rotifers & Copepods

- FREE SWIMMING ROTIFERS & Copepods
- 100% NATURAL
- NO PRESERVATIVES OR ADDITIVES

Available Here
100% NATURAL, FREE SWIMMING ROTIFERS

- NO PRESERVATIVES OR ADDITIVES
- RAISED IN FLORIDA AT OUR AQUACULTURE FACILITY

Dr. G’s Aquacultured Rotifers, are truly planktonic, free swimming zooplankton—the base of the marine food chain, extremely nutritional to all reef inhabitants.

Dr. G’s Rotifers will stay alive, swimming in the water column and stimulating feeding responses by Corals, Clams, Filter Feeders, bigger forms of Zooplankton and small fish.

Rotifers are what they eat, and ours are fed exclusively with Dr. G’s Phytoplankton. They are extremely rich in high value fatty acids (DHA & EPA) and carry these high potency nutrients to tank inhabitants as they are consumed.

Rotifers are excellent as food for fry, copepods, clams, shrimp and mandarins. Sea horses absolutely love them.

Our Rotifers are Brachionus plicatilis L type species, (150-300 microns), grown in our own facilities.

100% NATURAL, FREE SWIMMING COPEPODS

- NO PRESERVATIVES OR ADDITIVES
- RAISED IN FLORIDA AT OUR AQUACULTURE FACILITY

Dr. G’s Live Copepods are a fundamental part of the marine ecosystem—zooplankton food. These Copepods, Phylum Arthropoda are small crustaceans, which constitute one of the greatest sources of protein in the ocean.

Copepods have two different modes of propulsion—gliding and jerking—movements that stimulate feeding responses.

Dr. G’s Live Copepods are the best food for fish that will only eat live foods. Seahorses, Mandarin, Dragonets, Blennies and Pipe Fish all depend on copepods for survival. Other fish, like Anthias, Fire Fish, Chromis, Butterfly Fish, Angelfish, Gobies, Wrasses, Shrimp, Crabs, Anemones and Stars all benefit.

Copepod eggs and larval stages are food for both stony and soft corals such as Acropora, Black Coral, Lace Coral, Gorgonians, Chilli Coral, Carnation Coral, Sun Corals, LPS Corals, etc. Dr. G’s Live Copepods are also great for marine aquariums with live rock.

Copepods will reproduce on the tank’s refugium, boosting energy and nutrient flux—great importance to the well-being of the aquaria.

Dr. G's Marine Aquaculture, Inc.
3160 SW 189 Terr., Miramar, FL 33029
OYSTER MAGNIFIQUE

- PERFECT FOR DIFFICULT TO FEED CORAL, FINICKY FISH OR NEWLY ADDED AQUARIA
- STIMULATES ALMOST IMMEDIATE OPENING OF CORAL POLyps AND FEEDING RESPONSES
- PROMOTES CORAL GROWTH AND COLOR INCLUDING SPS AND LPS

Dr. G's Oyster Magnifique is a blend of oyster tissue, oyster eggs and garlic—a feast for all tank inhabitants.

Our all natural blend is extremely rich in proteins, amino acids, caroten, vitamins, highly unsaturated fatty acids (HUFAs), polyunsaturated fatty acids (PUFAs) and Omega 3 and 6 fatty acids. Perfect for SPS, LPS, zoanthids, soft corals and other filter feeding invertebrates.

The feeding response to this oyster blend from corals, fish and other invertebrates is so strong that it creates a real feeding frenzy. Watch the polyps extend on your corals as they reach out to eat. Fish simply go wild!

Dr. G’s Marine Aquaculture, Inc.
3160 SW 189 Terr., Miramar, FL 33029
DECAPSULATED BRINE SHRIMP EGGS (ARTEMIA)

- ESSENTIAL FOOD FOR SMALL FISH & SOFT CORALS
- CONTAINS NUTRITIOUS LIPIDS, AMINO ACIDS & ENZYMES
- SHELL FREE AND STERILIZED WITH NO HARMFUL MICROBES OR CHEMICALS
- PROCESSED IN FLORIDA AT OUR AQUACULTURE FACILITY

Brine (Artemia) Shrimp eggs are a highly nutritious food source for small fish and soft corals, however the “Shells” of Brine Shrimp are not digestible and can block the intestinal tract of fish, causing death.

To safely eliminate the shells, Dr. G’s uses a procedure that oxidizes the chorion (Shell) but leaves the eggs with their healthy lipids, amino acids, and enzymes intact.

An additional advantage of this oxidizing process is the complete disinfection of the eggs, eliminating any organisms that could cause infections to your aquarium.

When Brine Shrimp hatch they consume most of the energy that was stored in the egg. Our removal of the shell process eliminates the hatching viability while maintaining the highly digestible energy and nutrition.

Dr. G’s Decapsulated Brine Shrimp Eggs are simply “Shell Free Eggs”, allowing you to feed pure energy—energy that would have been used in the hatching process.

Premium Nutrition

Frozen Banquets

- Medicated Banquets Treat Your Fish, Not Your Tank
- For Marine & Freshwater Fish
- No Preservatives, Binders or Gels
The best vehicle to provide medication to a fish is through their food, not the water they swim in, which is why Dr. G's Medicated Frozen Banquets effectively treat marine and freshwater fish. Our unique formulas provide the medication your fish need plus the premium nutritional value of high protein foods made with the finest and freshest ingredients. No preservatives, binders or gels. Coral reef safe.

**ANTI-PARASITIC Rx**

The effective new treatment for several forms of marine and freshwater parasites that can harm or kill your fish, including Amyloodinium/Oodinium (Marine Velvet/Coral Fish Disease), Brooksella (Clown Fish Disease), Cryptocaryon (Marine Ich/White Spot Disease) and Ulroema.

**DE-WORMER Rx**

The effective new treatment for several forms of marine and freshwater worm infestations that could harm or kill your fish. It is estimated that 80% of all fish have some type of worm infestation. Dr. G's De-Wormer Rx treats infections caused by internal and external worms, such as gill and body flukes, tapeworm, turbellarians, planarians and flatworms.

**ANTI-BACTERIAL Rx**

Effectively treats “hole-in-the-head”, protozoal infestation, hexamita, mouth fungus, popeye, fin and tail rot, septicemia, dropsy and ulcers. It does not adversely affect the filter bed, is easily removed with carbon and is non-toxic to nitrosomas and nitrobacter. Dr. G's Anti-Bacterial Rx provides a broader spectrum of antimicrobial activity that is extremely effective against a wide variety of bacterial infections.

Dr. G's frozen foods are intended for the discerning, sophisticated aquarist that requires premium nutritional benefits. The exceptional quality of our ingredients triggers an excited feeding response in freshwater and marine tropical fish that is irresistible to finicky eaters or new arrivals. They contain no preservatives, binders or gels. Packed in easy to use frozen cubes.

**BIO-ENRICHED BRINE SHRIMP**

Dr. G's Bio-Enriched Brine Shrimp are supplemented with the freshest, natural and most nutritious blend of Phytoplankton, Seaweed, HUFA, Garlic and Spirulina algae. Adult Brine Shrimp are naturally rich in protein & carbohydrates. Our Brine Shrimp are additionally fortified with our own unique formula boosting Omega 3 oils, vitamins and pigments, giving your fish health and incredible colors.

**MYSIS SHRIMP GUT LOADED**

Dr. G's Bio-Enriched Mysis Shrimp naturally contain a nutritious blend of vitamins, amino acids, Omega 3's and have an extremely high protein content. Our Mysis shrimp are specially packed and sealed to preserve freshness providing a balanced nutrition for healthier, more colorful tropical fish and LPS Corals.

**PACIFIC KRILL**

Dr. G's Pacific Krill are wild caught in the Pacific Ocean and immediately flash-frozen to preserve freshness. Pacific Krill are naturally rich in protein, carbohydrates, high unsaturated fatty acids (EPA and DHA) and antioxidants (Omega 3's). They are believed to be the ocean's richest source of protein and are also very high in vitamins. Our Pacific Krill is specially packed and sealed to preserve freshness, providing a balanced nutrition for healthier, more colorful marine fish.

Dr. G's Marine Aquaculture, Inc.
3160 SW 189 Terr., Miramar, FL 33029
State of Florida Aquaculture Certification AQ2216021
Dr. G’s Silversides are found in the oceans as schooling fish. They are flash-frozen immediately upon catching to retain their incredible nutritional value and are not heat processed to maintain their natural vitamins and nutrients. They are also, vitamin enriched when packed at our facility in Florida.

Dr. G’s Silversides provide the proper nutrition to promote healthy fish, vibrant colors and contains no harmful bacteria or parasites.

These marine fish contain essential nutrients not found in conventional fresh water feeder fish (goldfish, etc.). Silversides are an excellent source of marine protein and oils for predatory carnivorous fish (triggers, groupers, morays etc), carnivorous invertebrates, anemones, crab, shrimp and are naturally rich in Omega-3 Fatty Acids.

**SILVERSIDES VITAMIN ENRICHED**

**PREMIUM FROZEN NUTRITION**

100% Natural, Whole & Clean Silversides. For Aggressive Feeders, Predators & Large Carnivorous Fish. Excellent Source of Marine Proteins and Beneficial Fish Oils. Individually quick frozen (IQF). Contains no preservatives, binders or gels.

Wild caught in Canada, Packed in the U.S.A.

and at a “Better Price” than the competition!
ARCTIC CYCLOPS

Dr. G’s Arctic Cyclops (copepod species), are collected from Arctic sea waters. To survive the extreme conditions of the Arctic, these pods require storing magnificent quantities of rich protein & fatty acids as Omega 3 & Omega 6, which are all critical to the Reef inhabitants.

Cyclops also must survive 24 hour sun exposure, so they produce protective pigments, called carotenoids (astaxanthin, cryptoxanthin, echinenone). When your fish, corals and reef animals, are fed with Dr. G’s Arctic Cyclops, the color enhancer properties are passed on, bringing out vibrant, vivid color in all the animals in your aquarium.

• Full 3.53 oz (100 grams) Flat Pack, that is 33% more product than other brands!
• 100% Natural Arctic Cyclops (Premium Frozen Zooplankton)
• Extremely high protein content needed for Fish, LPS corals, invertebrates, zoanthids, anemones, & all zooplankton feeders.
• Packed with natural anti-oxidants (HUFA’s) and color enhancing properties - Brings out the colors in all your Reef inhabitants
• No Additives, No Preservatives, No Fillers or Gels
• Use in Salt Water and Fresh Water Aquariums
• Zip Bag locks in freshness, avoids freezer burns and prevents smelly freezers

They are intended for the discerning, sophisticated aquarist that requires premium nutritional benefits. The exceptional quality of our ingredients triggers an excited feeding response in freshwater and marine tropical fish that is irresistible to finicky eaters or new arrivals.

They contain no preservatives, binders or gels. Packed in easy to use Flat Pack.

- Reef Calcium 16 Oz
- Sea Salt (150, 50 & 10 Gallons)
PHOSPHATE REMOVER

- HIGHEST QUALITY
- NO HARMFUL CHEMICALS
- MADE IN THE USA

Dr. G’s Phosphate Remover permanently removes Phosphates, Heavy Metals, Organic Compounds and other pollutants. Phosphates are a by-product of excess food and decomposed organic wastes from fish and other living creatures.

Phosphate is also present in some poor Phytoplankton preparations, where you are simply adding dead organisms to your system. Using Dr. G’s LIVE Phytoplankton will help eliminate these problems and provide the necessary nutrition for corals.

Dr. G’s Phosphate Remover is the purest form of super absorbent "Ferric Oxide" available. It does not leach aluminum into the aquarium or affect pH and hardness and will last for several months. Replace when Phosphate levels start to rise above 0.03 PPM.

NITRATE REMOVER

• EFFECTIVELY REMOVES HARMFUL NITRATE
• RAPIDLY ELIMINATES TOXIC NITRATE
• MADE IN THE USA

Dr.G’s Nitrate Remover is not a slow zeolitic sponge and is packed as moist, uniform spherical beads. Active life depends on the nitrate concentration in the aquarium. It will stay effective for several months before changing. Nitrates are a by-product of excess food and decomposed organic wastes from fish and other living creatures.

Nitrate can kill your fish and produce nuisance algae blooms. Natural oceans have very low nitrates, generally well below 5 ppm. You should maintain your Nitrate levels should be maintained below 10 ppm, to keep fish healthy and eliminate algal growth.

Dr. G’s Nitrate Remover provides the perfect balance tanks need.

To aid in removing Nitrates, you can also use live plants. Dr.G’s Mangroves are the perfect solution.

RED SLIME ALGAE CONTROLLER

- HELPS REMOVE CYANO-BACTERIA
- NO HARMFUL CHEMICALS
- FOR AQUARIUMS UP TO 300 GALLONS
- MADE IN THE USA

Red Slime (Cyano Bacteria) happens in all tanks, especially in new set-ups. Red Slime starts as small patches and spreads to cover sand, rock and coral. Once the rock or coral are covered, the red slime algae will inhibit gas exchange and nutrients to the organism, causing their death. Once Red Slime algae settles in your aquarium, it has already started to destroy your corals.

Dr. G's Red Slime Controller will help reduce (and may eradicate) the problem.

Note: Corals that have already been irreparably damaged by the slime algae—beyond a point of being able to recover—will inevitably die off, even with the use of this product.

NATURAL MAGNESIUM

- PROMOTES HEALTHY SOFT AND STONEY CORAL GROWTH
- BENEFITS BIVALVES AND CORALLINE ALGAE

Dr. G's Magnesium is indispensable for healthy Bivalves, Soft and Stoney Corals, and promotes Coralline Algae growth. It is also essential for the critical buffer system (pH level) and helps establish a stable Eco-System—encouraging beautiful, healthy specimens.

Magnesium is extremely important in the calcium reactions of any aquarium, preventing calcium precipitation. Coral and algae growth deplete magnesium; it is also lost by the use of excessive kalkwasser. If magnesium levels are low, proper calcium and alkalinity cannot be maintained.

Dr. G's Magnesium is produced from Natural Magnesium Chloride. Extracted from seawater after the salt has been removed, and the water evaporated, it is the purest form of Magnesium available.

Dr. G's Magnesium is free of phosphate, nitrate or gluconate, so it will not produce Slime Algae or unwanted algae growth.

IODIDE

- CONTAINS ONLY HEALTHY, SAFE IODIDE
- NO TOXIC IODINE

Dr. G's Iodide is an indispensable chemical needed by Soft Corals and Invertebrates. Essential for Gorgonians, Turritas, Sponges, Xenias, Worms, Shrimp, etc.

It is extremely important to maintain a tank's iodide levels as close to the ocean levels as possible. Iodide is quickly consumed by tank inhabitants, or depleted by protein skimmers and other forms of filtration. Dr. G's Iodide allows you to restore and maintain desirable iodide levels.

Fish will develop goiters (abnormality of the thyroid gland), if they don't receive sufficient iodide. Xenias will stop having the rhythmic pulsing movement and may fall motionless if they lack iodide.

Dr. G's Iodide is a safe source of iodide and will not convert to toxic free iodine that can destroy beneficial bacteria. Dr. G's Iodide contains none of the organic iodine which harms your system.

IONIC STRONTIUM & MOLYBDENUM

- WILL NOT PROMOTE UNWANTED ALGAE GROWTH
- NO HARMFUL CHEMICALS OR PHOSPHATES
- MADE IN THE USA

Ionic Strontium & Molybdenum are essential chemicals used by hard corals, coraline algae, soft corals, starfish, clams and other shellfish, tube worms and gorgonians.

Strontium is a chemical constantly extracted from seawater by calcium-consuming organisms, which use strontium for aragonite construction.

It must be added regularly to maintain levels as close to natural levels found in seawater: 8 - 12 ppm (mg/liter).

Dr. G's Ionic Strontium & Molybdenum is extremely important for ideal soft and hard coral growth. Our perfectly balanced formula enhances and maintains peak coral growth, inhibits alkalinity drop and strontium precipitation. Used regularly, corals open more and remain attached to their skeletons.

CORAL REEF CALCIUM

- EASY TO USE – HIGHLY CONCENTRATED
- ESSENTIAL FOR STONY CORALS (SPS & LPS), SHELLS, CLAMS, SNAILS, CALCAREOUS ALGAE & TUBE WORMS
- OPTIMIZED BLEND OF IONIC CALCIUM & BUFFERS
- SUPPLIES TRACE ELEMENTS AS IODIDE, MAGNESIUM & STRONTIUM AT NATURAL RATIOS

Calcium is a major element in the skeletons of hard & soft corals, calcareous algae, and leather corals. Calcium is also involved in many complex biological processes in your aquarium, reason why is rapidly used and depleted.

Regular water changes do not import enough Calcium to a tank, so it must be added regularly. We suggest keeping an aquarium concentration of Calcium as close as that to Sea Water: 400 – 460 mg/L of Calcium.

Animals and Corals are susceptible and vulnerable to rapid and drastic changes of chemistry in an aquarium, we do not recommend to raise Calcium levels more than 15 mg/L per day. Add Calcium (same with any other additives) over a period of several days until you reach the desired level.

Dr.G’s has highly concentrated this Calcium supplement and balanced it with ions of magnesium, strontium and iodide, all at natural Sea Water ratios.

ACTIVATED CARBON

- REMOVES ORGANIC POLLUTANTS, TO KEEP WATER CLEAN, HEALTHY AND CRYSTAL CLEAR
- EXTREMELY LOW ASH CONTENT, ACID-WASHED AND PRE-WASHED IN RO/DI WATER
- MADE IN THE USA

Dr. G’s Activated Carbon contains only the highest quality bituminous activated carbon and does not contain anthracite coal, wood, peat-based or coconut shell carbons. This product is an exceptional chemical filter and quickly removes pollutants and toxins (chlorine, chloramines), hazardous dissolved organic compounds (DOC), odors, colors, organic acids, proteins, hormones, antibiotics, chemicals, medications, metals, and minerals. It also removes the yellowish tint from water and absorbs odor-causing phenols, leaving your water healthy and crystal clear. This product has an extremely low ash content, is acid-washed and pre-washed in RO/DI water, will not leach phosphate or absorbed elements back into the water and will not affect the pH. Dr. G’s Activated Carbon is perfect for use in salt or fresh water aquariums, ponds and reef systems.

CHEMICAL FILTER MEDIA

- STABILIZES PH AND PROTECTS FROM DANGEROUS PH FLUCTUATIONS
- REMOVES NITRATE, AMMONIA, FISH WASTES, ORGANIC MATTER, TOXIC CHEMICALS AND ODORS
- MADE IN THE USA

Dr. G's Aquarium Chemical Filter Media is a purifier with exceptional filtration capacity that rapidly removes nitrate, ammonia, fish wastes, organic matter, heavy metals, copper, metal ions, toxic chemicals and odors from water, prevents the multiplication of harmful bacteria, stabilizes pH and prevents dangerous pH fluctuations. The blend of bituminous activated carbon and ion exchange resins will purify your water, making it crystal clear and free of dissolved byproducts in just a few hours with minimal or no impact on trace elements. Dr. G's Chemical Filter Media is long lasting, requires little maintenance and removes pollutants from your water that other biological and mechanical filter media cannot. It is perfect for use in salt or fresh water aquariums and ponds.

Dr.G's has a Supplies for Coral Propagation, which are:

- Very easy to use
- Excellent bonding properties
- Quick drying times
- More economical than any other competitor products in the market
- An All American Product!

Extraordinary Products @ an Ordinary Price !!!

Dr. G's MARINE AQUACULTURE

Supplies for Coral Propagation

Coral Bond GEL
Coral Bond EPOXY STICK
Coral PLUGS
At Dr.G’s we pack Retail Size and Bulk Size for Store and Institutional Use:

- **Metronidazole**
  - **Tetracycline**
    - **Kanamycin**

➢ We do carry “Any Medications” you may require at Bulk pricing, please contact us!
Dr. G's has Excellent Products in this Series and at “Better Prices” than the competition:

3-Stage RO/Single DI Filter – 24 GPD
5-Stage RO/Double DI Filter – 80 GPD
6-Stage RO/Double DI Filter – 80 GPD

Any Custom Filters up to 3000 GPD for Store Use.

Any Replacement Cartridges for any RO Filters, any brand and any size.

Please give us a call for any spare parts or custom filters.
DOUBLE DEIONIZATION & RO FILTER

Dr. G’s RO systems are the only ones available with Double De-Ionization filters and a Total Dissolved Solids Meter.

Our unique system designs includes a 5-stage and 6-stage unit capable of producing 100 gallons of filtered water per day and ‘Double’ De-Ionization Post filters that ensure your Total Dissolved Solids are always within system requirements.

Our systems also have a Total Dissolved Solids Meter that measures both tap water and filtered water TDS. The entire system is supplied with quick fittings and color coded tubing.

Larger RO & DI and Custom-built systems are also available. Contact us for pricing on these systems.

CARBON BLOCK REPLACEMENT FILTER

Dr.G’s 0.5 micron carbon block filters are manufactured with high purity activated carbon with extruded activated carbon block construction, providing the purest and cleanest water available.

Fits most standard 10"-housing reverse osmosis water filter systems.

SEDIMENT PRE-FILTER (ONE MICRON)

This is the first stage filter on any RO system, providing ultra fine filtration to prevent any sediment (dirt, rust, sand particles, etc) in the tap water from reaching the RO membrane.

Fits most standard 10"-housing reverse osmosis water filter systems.

RO MEMBRANE ELEMENT

Dr.G’s has different RO Membrane Elements rated to handle 25, 50, 75, 100 or 150 gallons per day.

Our elements purify about 20% more water than membranes rated at 60 psi and can be used in many Reverse Osmosis Systems.

For best results these units should be changed every 2 to 5 years based on water quality and usage. Pre Filters should be changed regularly to extend the life of your RO Membrane Element.

**DI RESIN CARTRIDGE** FOR INLINE INSTALLATION

This cartridge is compatible with any RO or RO-DI systems and it is the same one that comes standard in our RO/double DI systems.

On average, an inline DI cartridge is able to process about 500 gallons of RO water.

Nuclear grade with color indicator, it provides 0 ppm TDS, conductivity attainable less than 0.1µS/cm or resistivity of close to 18 meg.ohm.

Dimension: 2 x 10" • Input/output size: 1/4" FPT

**DI RESIN REFILLABLE CARTRIDGE**

FITS DI RESIN CANISTERS

Standard 10 x 2.5" Refillable DI Canister with screw on bottom, for 10" filter housings. When DI media is exhausted, you can refill with Dr. G's DI Media Refills.

**DI RESIN CANISTER**

10" FILTER HOUSING CANISTERS

Dr. G's clear housing canisters house our DI Resin Cartridges (Item #221).

RO WATER STORAGE TANK

Our 4 gallon white metal tank with a 1/4" tank valve makes top-off easy. Larger tanks are also available. Contact us for pricing.

RO BOOSTER PUMP

This low voltage pump is designed to operate continuously at near constant pressure until the RO Water Storage Tank is full. The output pressure is dependent on the reverse osmosis system’s total flow requirement, feed water pressure and available power source. The RO Booster Pump is designed to be installed on the raw water line feeding the RO unit. If you have low water pressure, the RO Booster Pump will increase your water pressure so the RO unit will make RO water at a faster rate.
